Prof. Sara Snogged Lise (Chairman),

Prof. Peter Brzezinski, Prof. Claus Gustaf, Prof. Olaf Trstram,

Prof. Johan Atavist, and Prof. Gunar Von Heine (Secretary)

Sturegatan 14, Stockholm, Sweden

Dear Hon'ble Professors,

With humble regards I, hereby, recommend for the 2016 Nobel Prize in Chemistry Professor Ruggero Maria Santilli of IBR and Thunder Energies Corporation, Thunder Energies Corporation, Tarpon Springs, Florida, U. S. A., for the discovery of the new chemical species of magnecoles as outlined and documented in detail in the web site <http://nobelprizeweb.com/index.php/nominations>

I further like to add that in view of its positive impact on the improvement of the quality of human life and environment, in my opinion magnecoles deserve to be scientifically acknowledged and rewarded at the highest level commensurate with the rich tradition of Nobel Prize in Chemistry.

Thank you for your consideration,

Sincerely,

Dated: April 18, 2016

Professor
